Owner notes:

Who are you? An Illustrator

What's important? My skills in photoshop, sketching, art.

What do you want to display? Headshot, my favorite quote, my journey (brief)

What do you want people to take from your site? (Long term & Short term)

Long: Inspiration, their next artist

Short: brief introduction, and show skills for networking

## Process sketches:

changes  
GG

## Google font options:

fancy - Fira Sans Extra Condensed - Carries Apostrophe

simple: Josef Slab - Santiago Orozco

very simple: Bentham - Ben Weiss

Italianno - Santiago Orozco

Antic Didone - Santiago Orozco

Want to:  
Simple - Standard site  
development  
built custom

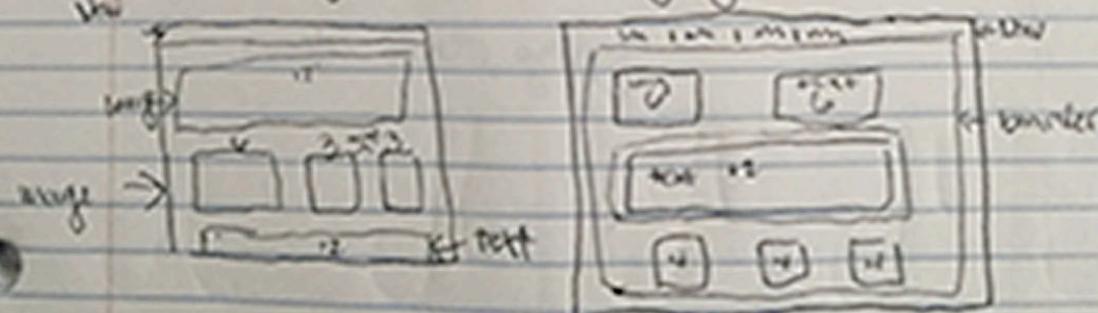

Editors:  
Simple layout  
website / portfolio  
branding - social media

UX: Expand your business, develop website  
Expand your brand, get your site developed  
here!

Get a customized website developed  
for your brand.

This website will help you build your  
brand

Hi, I'm Jason, a freelance web developer. It's  
my goal to help you expand your brand  
I'll design, design a customized website  
for your business. I'll also manage it for a  
monthly fee. This website will help you with  
networking, and showcasing your business.

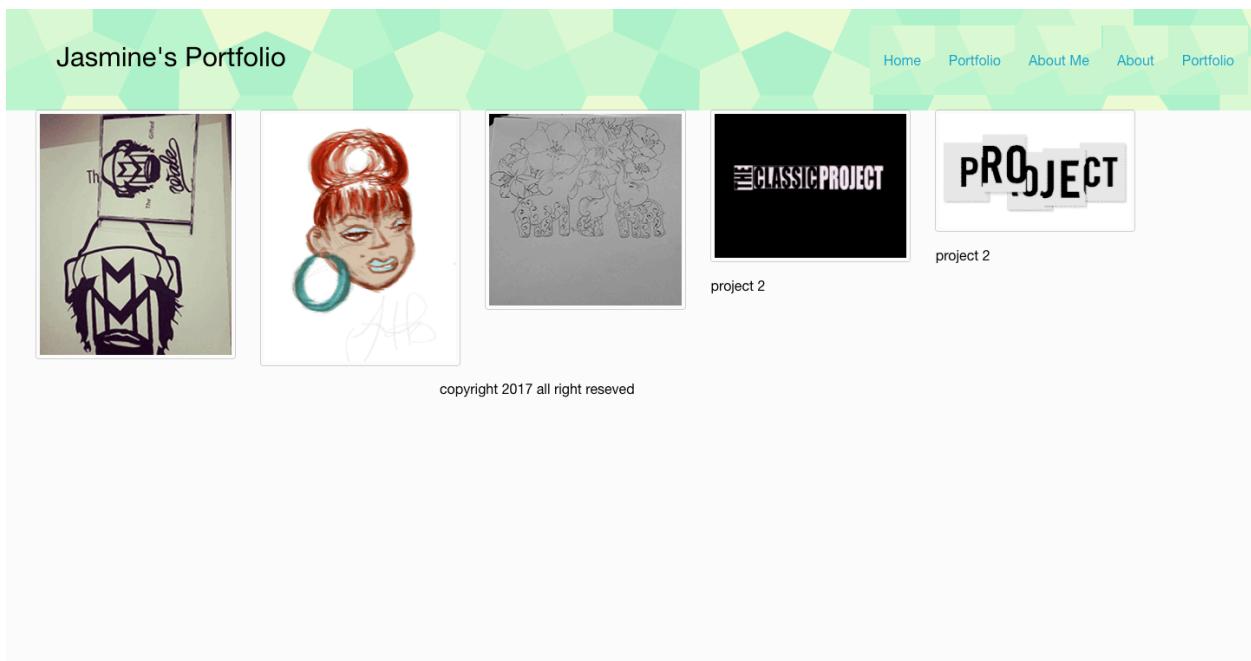

Project Design considerations:

(Explain 3 of your major design decisions)

I wanted a simple design, not too overwhelming to the eye. I chose cooler colors and textures.

Project Screenshots:

(one for each page in the project – scaled to take the whole page width, not distorted/stretched)

Project Reflection:

(250 words – reflective writing –What was the most challenging part? What was the most exciting part now that the project is done? What did you learn in this assignment, what is your biggest takeaway?)

The most challenging part was getting everything together. Organizing took some time. Then the layout took a lot of time as well. The content was also a bit challenging. I used the books and some tutorials to help me with the process. I learned that while it looks simple, it takes a lot of time to develop a page. I enjoyed learning new styles for my pages. I'm starting to understand Zurb a bit more now. Github is still new to me as well. My biggest take away unfortunately, was developing a structure for my time management on my project.
